(54) Title: CERAMIC BOTTLE FOR PLASTIC CORK

(57) Abstract: The present invention forms screw-like projection at the entrance of ceramic bottle and enables air-tightening with plastic cork, formed with screw-like projection in its body. It guarantees air tightening of ceramic bottle, and does not use imported cork, which decreases the need to import. Moreover, increases productivity by automating the air-tightening process of plastic cork. The present invention can reduce cost of production, at the same time, increasing productivity, and it can be re-used multiple times after the air-tightening.
